

Is this Another Interpretation of the Bible?

[FAQ 03]

I wonder what Michael Wood's personal agenda for this is. Beyond that, it's interesting how the article states Wood has removed "the final barrier to full societal acceptance of gays and lesbians." The final barrier? Hardly. As if one article by one cryptographer at one time that gives one interpretation of a Biblical passage is going to change the world? I don't think so. It won't be long before rebuttals to this, by other professionals who are just as intelligent, are published.

V

* * *

The finding isn't based upon "an interpretation of a Biblical passage." Rather, the finding is based upon two historical discoveries: the demarcation of the first century division of Jewish Law and the ancient usage of the Koine Greek word *dikaiomata*. There is no rebuttal forthcoming, for these are observable parts of the historical record.

The last obstacle to total equality has been the misinformed view of the Apostle Paul's Greek. Since the discovery is *historical* in nature, it is destined to tear down this final barrier to full societal acceptance of gays and lesbians.

Michael
